Tagged Sequences (used in AutoCAD) The Tagged Sequences feature allows you to automatically generate lists from a series of tags. For instance, you may have a series of tags used to flag the parts of a drawing that should be automatically assembled when you assemble the drawing. Pricing AutoCAD LT is available for purchase by individuals and for use as part of a technical school/college subscription. It can be used free of charge for all personal projects. Students can take it home and use it to create personal drawings or projects. Subscribers can use the software commercially for a per-seat fee. Technical school and college subscriptions are available at three prices: VAR: At a cost of \$299.00 per user per year. It includes the AutoCAD LT, DWG 360ML, DWG 360ML, DWG XML 360ML, and Tagged Sequence AutoLISP plug-ins, plus the Internet Explorer plug-in. Limited: At a cost of \$499.00 per user per year. It includes the VAR license, plus the Web Feature Checker, DWG 360ML, and DWG XML 360ML. Premium: At a cost of \$699.00 per user per year. It includes the VAR license, plus the Web Feature Checker, DWG 360ML, DWG XML 360ML, Tagged Sequence AutoLISP plug-in, plus the Internet Explorer plug-in, DWG Toolbox, and AutoCAD LT plugin for the Z-Proceso Robot. Comparison with competitor products Because of the way AutoCAD LT works, it is not possible to use it to edit drawings created with another CAD system, such as Microstation, Creo, or SketchUp, because the two systems use different file formats. The CAD system also lacks the ability to export to the wide range of standard file formats required by engineering firms, although this functionality can be added through third-party add-on tools. Features Some features of AutoCAD LT: Works with very large drawings by storing only a small portion in RAM at a time and the rest in a separate database. Uses a graphical, high-level, drag-and-drop interface to create drawings, called Wizards. Allows dynamic editing by supporting macros or scripting language features. Supports the 3D Warehouse and the DWG 360ML format (including support for the IDW a1d647c40b

Open Autocad. Click the Autodesk Account button. On the Select Account screen, choose and then the appropriate account. On the next screen, click OK. On the Select a Data Source screen, choose and then Next. On the Select Target Database screen, click OK. On the Select a Template screen, choose and then Next. On the User Accounts screen, choose and then Next. On the Select Options screen, choose and then OK. On the Customise My Drawing screen, choose and then OK. On the Finish screen, click Save. Licensing Licensing: Autodesk Autocad uses an in-product license model called Drawings that is not suitable for professional users. The user is only licensed to use the most recent version of Autodesk Autocad that is available on the date of purchase. For an overview of the Drawings licensing model, see Autodesk Autocad licensing model. If the Autocad product purchased has been activated, a product serial number is displayed in the upper left hand corner of the user interface. This product serial number is automatically registered on Autodesk's Global Registration Server. Any time the Autocad product is upgraded or reinstalled, this product serial number will be automatically registered with the Global Registration Server. If the Autocad product is not activated, the product serial number will need to be registered with the Global Registration Server. Click the button in the upper right corner of the screen to register the product serial number. The Product Registration screen will display with the information that was entered for the product serial number. When the registration is complete, the button in the upper right corner will change to (Registration is complete). When registration is complete, the only license remaining is the number of Autocad drawings used.
