]]> Open Source Git Repository Moves to GitHub 29 Nov 2016 14:38:59 +0000 Git is a version control system that is used to maintain software source code, although it is now also frequently employed as a means of maintaining similar data in other contexts. Git is widely used in the open source community and is at the heart of Microsoft's open source Git repository, called the Online Visual Source Code (OVSC) repository. The repo, which was first launched in 2012 and located on CodePlex, will move to GitHub as of Tuesday, January 4th. Git enables developers to combine their modifications and code with other contributors' code, and this can be done in various ways. While some developers prefer to push their source code to a repository from which anyone can access it, other developers like to collaborate on the same codebase, with each being responsible for specific changes and updates. The move to GitHub shouldn't impact the repo's availability at all, as it is still accessible from the Microsoft website as well as the CodePlex portal. Developers will just have to start using the GitHub version instead. Simplified structure The move to GitHub is a clear sign of Microsoft's commitment to the open source community, especially given the popularity of the Visual Studio Code editor, Git and GitHub. According to GitHub, the repository is now being hosted by Microsoft on GitHub because the Git software is now installed by default on Windows 10, as well as on many other operating systems. As such, moving to GitHub will make the repository easier to maintain and more accessible to others. Microsoft also plans to incorporate the improvements made by users into the development process for the next version of Windows, codenamed Threshold, and this will also be easier to do with the larger community of contributors that will now be at its disposal

Additional details: Go to Download: Sommarapismen is a Swedish political movement founded by a group of activists in 2002. The group consists of a number of young supporters of the Swedish nationalist right-wing party, the Sweden Democrats. It started in the spring of 2002, when the then-22-year-old party leader, David Jansson, asked the members of his party to become involved in politics, but at the same time as young people who supported the then-upcoming general elections. Since then, there has been a number of initiatives in which members of Sommarapismen have been active. This has included the distribution of pamphlets in which the movement, under the name "Sommarapismen", was accused of racism and xenophobia, as well as the publication of a booklet in which the movement was accused of "demonization of civil servants and immigrants". The party currently has no more than a hundred members, but in the spring of 2006, the local municipal elections in Norra Värmland resulted in candidates who were supported by the group, and who were successful.
