A major drawback of Excel is that its worksheet applications (e.g., cell, range, row, column, etc.) are fairly rigid and you typically find

yourself thinking inside their confines. This makes it very difficult to think outside the box, as it were, and to reuse and combine Excel's cells in useful ways. With Refinate, this is no longer an issue. Refinate is a system with power in its box, which allows you to combine cells, ranges and ranges of cells in new and innovative ways to solve everyday business problems. The power of Refinate lies in a combination of core and Refinate-specific functions. With Refinate,

you can accomplish many major tasks that are not easily done in Excel using a generic Excel worksheet. You can also perform minor tasks with precision using Refinate. What's New Added Features As it is a major revision, Refinate 5 includes the following additions and enhancements.

"The introduction of the Coronet to the USA was a top priority for us," said Ken Lamm, senior vice president of engineering and manufacturing at

Giant Crane. "The market response was so strong that we had to make the first production run of the crane to meet the demand."

The Coronet heavy duty construction crane has a reach of 16.5' and has a cab with seating for up to five workers. The Coronet's truck is rated to 1,500 pounds and can handle loads from 800-1300 pounds. What sets the Coronet apart from other heavy duty construction cranes on the market today? Giant Crane designers spent considerable time

working on the Coronet's all steel construction. Giant Crane wanted the Coronet to be as efficient, durable and safe as possible. Giant Crane achieved this with the use of space efficient sheet metal design, the use of four 40% larger cylinders and the use of oil filled hydraulic motors. Giant Crane invested in the use of high strength steel to minimize failures. Giant Crane also made use of a powerful combination of safety devices. The all steel construction of the Coronet was only possible because

Giant Crane partnered with Ladish to create a large production line that allowed the production of the Coronet at scales never before seen by construction crane makers. Giant Crane offered its engineering and manufacturing personnel to work with Ladish to design and build a production line specifically for the Coronet. Giant Crane's engineering expertise allows them to do many of the required modifications themselves and their design expertise allows them to fit the Coronet to a host of

other construction crane options.

"The Coronet is the first true production crane for the construction crane market," said David Theeman, president of Giant Crane. "Giant Crane didn't give 77a5ca646e

What's New in the?

Refinate is a tool that helps make your worksheets faster and easier to create, maintain, and manage. It is designed to provide the productivity benefits of its core

abilities to you as you work with worksheets. And it gives you a fresh new way to frame your ideas. Refinate has two core abilities: 1. Quickly reorganize data to gain access to information of interest. 2. Provide methods for verifying data integrity. How do I use Refinate? Use Refinate's organizational tools to help you quickly and easily reorganize your worksheet data. This tool will help you see more data patterns in your worksheet data in less time. This tool will also help you quickly

access information of interest in the worksheet. You simply drag and drop new tabs over your worksheet, group data, and see how the entire worksheet fits together. This tool also provides other handy organizational tools that save you time and allow you to efficiently organize the data in your worksheet. How do I use Refinate's data integrity features? Refinate helps you make sure you are getting the data you expect. You drag and drop new tables on your worksheet. Data in those

tables is verified against other tables, and you can verify data integrity from inside the workbook or in external databases. Refinate allows you to use the date field to see if certain data is new. This tool is very useful to quickly verify that your data is accurate. How do I use Refinate's other tools? Refinate's other tools help you build a powerful tool kit. Refinate has a variety of new tools, which help you do the following: Add formatting to cells. Add tables and charts to your

worksheets. Quickly check your worksheet for duplicates. Quickly reformat your worksheet to add custom column or row widths. Bulk move cells. Bulk delete cells. Refine the data in a column or row. Refine the data in cells using color. Using Refinate To start using Refinate, choose File > Open from the main menu. This opens the File Open dialog box. Choose Excel Worksheet from the Excel File Type drop-down list and browse to the location where you have Refinate. Select the file.

The Open dialog box should appear with Refinate highlighted in the list. Select Refinate and click Open. The file will open with the Refinate tab on the right side. The left side of the tab provides additional contextual information about the tab. To begin using Refinate, double-click the tab on the worksheet that you want to work with. This opens the Refinate workspace on the left side of the tab. This is the workspace for your editing. In the Refinate workspace, you can drag
