The AutoCAD cloud is a service that brings AutoCAD functionality, data and connectivity to a new class of devices and provides a web interface that accesses your drawings and design data from anywhere, using a web browser. The mobile apps allow designers to access, create, modify and edit drawings on a mobile device with the same features and functionality available on a desktop computer. AutoCAD Mobile is the mobile version of AutoCAD, the world's leading professional 2D and 3D drawing application. With AutoCAD Mobile, users can access and manipulate drawings on their iPad, iPhone, iPod Touch, or Android device. The app is designed to be intuitive to use for the novice or seasoned CAD professional and features the same advanced features available in AutoCAD, including 2D drawing tools, 3D modeling, 2D and 3D printing, and more. AutoCAD 3D Modeling Mobile allows you to create, edit, and view 3D models from your iPhone, iPod Touch or iPad. This app is the ideal companion for AutoCAD Mobile for creating 2D designs in AutoCAD and then bringing them to life using 3D modeling technology. With more than 2.6 million subscribers, Design2Go is Autodesk's global community platform to connect designers to engineering software. From over 5,400 educational institutions in more than 40 countries, Design2Go is the leading online solution for the rapid design and manufacturing of ideas. Design2Go includes Autodesk Alias, AutoCAD, Inventor and other software platforms that help today's students, designers and engineers to learn by creating and publishing their ideas online. The Design2Go service also includes Design2Go Market, a web-based application that aggregates all Design2Go content for consumers and professionals. It contains hundreds of design tutorials, software downloads, blogs and news from Design2Go users. AutoCAD is a solid 2D drafting tool with a variety of features for 2D and 3D drawing and modeling. Introduced in 1982, the first AutoCAD version ran on minicomputers. It was a universal application and

Data exchange Various data exchange formats are available in AutoCAD for importing and exporting data including: Microsoft Word – The Autodesk Word (not a word processor, but a 3D modeling tool) file format. This is a spreadsheet-style word processing application used by engineers to generate technical drawings that are to be included in a CAD system's model data. GeoCAD Microsoft Excel – The Autodesk Excel file format for.xlsx and.xlsm. GDAL/OGR (OLE and binary) – The GDAL/OGR (Open Source Geospatial Foundation) format is the file format used by the Linux-based LibreOffice project to represent vector data formats. It is based on the ISO standard ISO 19115:2003, in the form of the eXtensible Geography Markup Language. The file format provides support for large numbers of spatial data types, including: DEM Geoid DEM GEOGRAPHIC (2D) Raster (2D) Raster (3D) 3D vector format ArcScene/ESRI Vector format GeoPDF Geospatial PDF Data exchange between AutoCAD and a variety of data conversion tools for various data formats is available through the AutoCAD Exchange Web Service. Tagged media At the end of 2010 Autodesk announced that they would no longer implement support for tagged media (i.e., media that has an associated XML file or Extensible Markup Language (XML) or in AutoCAD itself), including the MDI drawings used in most of the software applications of Autodesk. However, the tag specification was added to the Open XML Format, and AutoCAD can still import and export tagged media. Support for Microsoft Office and SharePoint Microsoft has provided an API to open AutoCAD drawing files saved in an Office 2007 format (XML and Tagged format). The open drawing file dialog in AutoCAD can be customized to open documents from Office 2007 formats. AutoCAD also has a web service that allows users to browse, manage, and modify drawings saved in the Office Open XML format from a Microsoft Office SharePoint web application. The web service also makes it possible to open drawings directly from a SharePoint list or document library. In February 2009, AutoCAD 2010 released the Microsoft Office Open XML Part 2 (OOXML-2) file format. 5b5f913d15
