In 1814, a couple dozen ships were dispatched to search the Northeast Passage for a new shipping route to reach Asia from Europe. Since then, no one has ever returned from the Passage. No ship has ever been found on its shores. The only thing that remains of this little expedition are the logbooks found in the ship's holds. The Voyagers, now convinced it was a tragic accident, quietly buried the logbooks in the Greenland Ice Sheet. They were supposedly "lost" in a massive avalanche. Now it's your turn to find the logbooks.

BERLIN (Reuters) - For months, companies in Germany that sell dual-use technologies - that can be used for both civilian and military purposes - have remained cool towards the country's new law allowing citizens to possess weaponized drones. FILE PHOTO: German Foreign Minister Sigmar Gabriel (L) and German Transport Minister Alexander Dobrindt (R) pose with a model of the German domestic surveillance drone "Linsenflieger" ("Linesmen"), developed by Airbus, after a cabinet meeting at the Chancellery in Berlin, Germany, October 3, 2015. Two people briefed on a presentation on how the law could impact German business this week said the uncertainty has dissuaded companies from taking on such technology. Companies have also asked how they would know where to draw a distinction between civilian and military drone use and whether monitoring a large number of drones might violate privacy laws, they added. The law - meant to foster a domestic drone market and encourage German innovation - has been a source of concern since it was made public a year ago. It states: "Drones are military-technical objects... (and) are only to be used in the context of a federal intelligence agency for the purpose of an intelligence mission." German ministers have said the law only applies to UAVs used by Germany's three intelligence agencies and has nothing to do with civilian drones bought by the public and used for hunting, research, tourism and rescue. SENATE CHAMBER PASSES LAW After two years of delays and legal wrangles, a revamped version of the law, passed by the parliament's lower chamber, was passed by the upper house in April, overcoming opposition from other parties to make it into law. A company official said the passing

Gameplay The Flame in the Flood: Much of its appeal has to do with how compelling the experience is. Developed by tiny game studio The Molasses Flood, The Flame in the Flood: The Flame in the Flood is a 3D indie game created by a developer who goes by the name of Samair. He's originally from the US, and he worked as an engineer for years, before striking out on his own. The Flame in the Flood was created in just over six months,

and it's being published by indie publisher Devolver Digital for PC, PS4, and PS Vita, in North America. With *The Flame in the Flood*, Samair is creating a survival game similar to the early- to mid-'80s original *King's Quest*. So how does *The Flame in the Flood* play? It's a three-dimensional point-and-click adventure game where you're tasked with using whatever tools you can find in the environment to help you survive for as long as possible. You're by yourself in the game world, but you'll meet some characters along the way, and each encounter gives you new ways to escape danger. In *The Flame in the Flood*, you play as an engineer named Otto. He's the sole survivor of an oil rig explosion in the ocean, and the game tells you that Otto's ship was attacked by pirates. This gives you a goal: Otto must find a way to escape the ship. He must find a way to save his life. In the game, you use Otto's main tool to escape danger. You have a flashlight. Along the way, you'll find objects and other tools and materials. Your flashlight will let you see in the dark, and you can gather materials from the environment. You can use these to craft tools and accessories to make your life easier. For example, Otto can make ropes, pieces of wood, hooks, and other useful items. You can also build bridges that can help you cross over gaps in the environment. Game play - Story You may notice that the game is divided into chapters. The chapters are arranged so that they are in chronological order, but each one is self-contained. Each chapter has a unique goal. You won't solve each chapter's goal immediately, and you won't finish the chapter before continuing to the

### **What's new in The Flame In The Flood:**

**The Flame in the Flood is the first novel by Irish author Alan Dransfield. First published in 2001 in hardback by Tindal Street Press, it was republished in paperback by Picador in 2003. It tells the story of Seamus Finnan, a schoolteacher from an Irish rural border area of the 1950s. Here, he and his family survive an IRA bombing that kills his entire community during the development of the Northern Ireland problem. While the novel focuses on Seamus' traumatic experience, the family gradually tries to rebuild their relationships and their faith and religion after the bombing. Dransfield also explores the darker sides of history, questioning the realities of the relationship between Irish citizens and British soldiers, the morality of their actions and the intolerance within the Irish state. The American edition was published by Delacorte Press in 2002. This edition was "re-published in 2005 to coincide with the 30th anniversary of the IRA bombing of Corktown in 1977". Plot summary Set in rural north Cork, Ireland, immediately after the partition of Ireland in 1922, the story centres around Seamus Finnan, a schoolteacher in the small village of Kilskeagh. Living with his wife Aisling and daughters Rosemary and Fidelma Finnan, Finnan lives a relatively settled life with the exception of the recent bombing of his school where the death toll was 22, including his 14-year-old daughter**

**Fidelma.** Written in first-person narrative, the story is split into two intertwining acts, the first outlining the immediate aftermath of the bombing and the second detailing the slow rebuilding of Finnan's life and family. The novel juxtaposes Finnan's past against the experience of his family and depicts the story from multiple perspectives: writer's omniscient narrator, Rosemary, Fidelma, the doctor and Seamus' friend, James Gallagher, and Seamus' teenage son Conchú. The bomb is discovered in a letter in Finnan's mailbox at the school. He and his wife were eating their evening meal when the bomb went off. Seamus and his friend James teach their sons at the school and are both killed in the blast. Finnan's wife and daughter Rosemary are badly wounded, and his teenage son, Conchú, who witnessed the incident, is last seen a few days later when he leaves the family home. The black-and-white story is divided into three acts. In the first, Finnan
