KeyMacro for Mac 4.3 (Mac OS X 10.3/10.4) is a very powerful, easy to use and fast Mac OS X clipboard tool that allows users to easily copy/cut/drag objects (including but not limited to text, images, file paths, URLs, links, MS Office files, PDF documents, etc.) to any TextEdit, TextMate or TextWrangler open or closed document, and paste them into any application that can receive the command. This is a new version of KeyMacro, which fixes a bug that prevented users from working with all applications on Mac OS X 10.3/10.4. KeyMacro includes two new features - it can automatically save a copy of the clipboard to a recent file or clipboard history, and it has a full-screen mode. As the name of this program implies, iPod Movie Maker prepares video files for iPod devices, but also for iPhone, PSP, DVD movies and Zune. Plus, it can turn the format of videos into MPG, FLV, 3GP, AVI, WMV and MP4, as well as extract the audio stream and save it to MP3. The interface of the software app is plain and intuitive. Adding files to the list can be done via the file browser, tree view or 'drag and drop' functionality. Working with multiple videos at the same time is permitted. In the file list you can find out the name, duration, format, size, frames per second, and status of each clip. If you don't mind the default settings, then you can immediately start the conversion operation after selecting the output profile and directory. Skilled users may tinker with the audio and video properties in regard to the codec, size bit rate, frame rate, sample rate, channel mode and synchronization. Alternatively, you can disable the audio stream. Additional features of iPod Movie Maker allow you to preview clips in a built-in media player and trim it by marking the start and end position or time values, select the audio track, download clips from YouTube, as well as merge videos. By accessing the 'Options' screen, you can change the default output folder, specify the process priority and number of threads, and schedule iPod Movie Maker to turn off the computer when all tasks are done. Further customization settings concerning the audio and video are available. For example, you can adjust the volume level or enable normalization, pick the constant or variable 2edc1e01e8
