Now, alongside IBM SPSS Statistics, the popular business statistics software, comes IBM SPSS Modeler.Q: Renaming a database server works but does not remove the old database server from the group? I have two servers (OS: Windows Server 2008 R2) that are running SQL Server 2012. I'm trying to remove one of the servers from the list of available servers in SQL Management Studio and rename it to something else. The rename server action works

fine and everything appears to be ok. The view for that server now has the new server name but the server itself is still listed in the list of available servers. The SQL server name as well as the SQL Server 2008 server name and instance are the same. I have ran sp_helpdatabase command via SQL Management Studio and it successfully retrieves the correct details. I have run sp_msforeachdb 'ALTER DATABASE? SET RECOVERY SIMPLE
