Once you have downloaded the cracked version, you need to disable all security measures, such as antivirus and firewall protection. Then, you need to open the crack file and follow the instructions on how to patch the software. Once the patching process is complete, the software is cracked and ready to use.

The most obvious new feature in Lightroom 5 is the Story panel, which is part of the Develop module. Want to focus on this new feature now and get back to Lightroom's core editing features soon? Continue Reading The Story panel is an extension of the original concept for editing photos, well-illustrated in Adobe Photoshop . Develop lets you view several photos at the same time by splitting the workspace. But with the Story panel, you can view only one image at a time and edit it. The options for this image affect the other ones as well. By default, you have a typical, edit-in-place mode, shown in the top panel. You can switch to the thumbnail view or your photo-editing window by clicking the Load Defaults button in the top panel. If you check the box "Continue editing in frame mode," the panel changes to the template view, which lets you view some of the editing functions such as brightness or contrast. Place another check mark in the box "Preserve proportions" to return to the standard view or resize the frame with your mouse. With Story panel, you can do all of the things you can usually do in Develop such as red-eye removal and eye color correction. This is a purely editing tool, not really affected by what other modules you have activated. There are two tabs for controlling the light and dark areas in the photo; you can tame brighter or darker areas by setting a pre-selected standard. You can also view similar photos, remove objects from the photo, or add artistic effects ranging from artistic filters to photo fragments. You can see the size of the edit on a scale, and you can apply the filter to multiple parts of the photo. The filter appears next to the canvas. You can swap between different effects by clicking on that tab.
